

MAGNUM[®] S-Control

On/Off Thermostat

Electrical heating systems offer a lot of advantages compared to conventional heating systems. Besides the fact that they are completely maintenance free and can be installed virtually unnoticed, a big advantage is that every room can be heated separately with its own thermostat. Depending on the occupation and the heat requirement, every room is heated differently.

The MAGNUM S-Control is a simple, easy to use on/off thermostat with temperature control. In case programming is not wanted, but manual adjustments are required (full time heating or different times of occupation) this thermostat offers great value for money.

Applications:

- Suitable for main or auxiliary electrical heating sources
- With floor and internal room temperature sensor
- Electrical floor heating systems (Enermat, Enercable)
- Living rooms
- Bathrooms
- Kitchens
- Conservatory
- Hall / toilet
- Offices
- Canteen
- Showrooms etc. etc.

Sectors:

- Utility buildings and industry
- Houses
- Renovation
- logistic centres
- hospitals
- Recreation

MAGNUM[®] S-Control

Technical data

The MAGNUM S-Control is a simple, easy to use on/off thermostat with temperature control, specially designed for electrical heating systems. In case programming is not wanted, but manual adjustments are required (full time heating or different times of occupation) this thermostat offers great value for money.

A very simple On/Off push button thermostat, turn the temperature to the required level, and the thermostat takes over! The MAGNUM S-Control is not only suitable for floor heating systems (by using the floor sensor which is included) but can also be used in combination with wall and/ or ceiling heating systems, since the S-control has a built in room temperature sensor.

MAGNUM S-Control is a simple built in clock thermostat, suitable for switching electrical heating systems. The built in clock thermostat can also be wall mounted by using an additional frame.

Maximum power 16A / 3600 watt (230 V). If more power is required, a contactor has to be used.

Technical specifications:

MAGNUM S-control thermostat	
Floor sensor included	
Built in room temperature sensor included	
Voltage	: 230 Volt - 50/60 Hz
Max. power	: 16 A / 230 V
Min/max temp.	: +5/+40°C
Colour	: Polar white (RAL 9010)
Guarantee	: 2 year
Approvals	: FI/ CE/ CCA
Supplier	: C&F Technics, Netherlands

Article #	Type	Power	Amperage	Voltage
827000	MAGNUM S-Control	max. 3600 watt	max. 16 A	230 V

Article #	Type
